

# Turbo Washer

## TW-Series

### Application:

The Turbo-wash replaces the pre-washing tank of the first-generation washing plants. The machine is designed according to the principles of a Vertical centrifuge and includes a combination of washing and a subsequent initial drying action. It is therefore possible to process very dirty pre-shredded material with high paper content and Aluminum foil residues. The Turbo-wash also improves the recovery rate of the Sink Float Tank.

### Technical Specification

Model	Drum Size	Motor	Production
PPM-24/30TW	24 Inches	25 HP	100 kg/hr
PPM-32/39TW	32 Inches	50 HP	250 kg/hr
PPM-40/42TW	40 Inches	75HP	500 kg/hr
