

Extruder Machine

This machine is developed for pelletizing a wide range of Polymers like LDPE, HDPE, PP, PVC, PET, HIPS, PC, ABS etc.
Production from 50kg to 500 kg/hr.

Extrudery Machine

Pelletizing/Repelletizing a wide range of applications in the pelletizing of polyolefins can be handled using single screw extruders. Proven concepts with & without grooved feed zone and combination with & without a barrier screw permit high outputs and outstanding dispersion results. Strand, underwater or water ring pelletizers are used, depending on the application in hand. Material venting and smooth feed bushes can be supplied for special applications.

Main Features :

- Single screw & Twin Screw also.
- Base made of electro welded steel sheet & channel.
- Gearbox unit with casehardened and hardened gear pair with ground profile.
- Helical Extruder cylinder and screw is nitriding steel with high skin hardness.
- Main electric panel with thermo regulation zone & electric drives controls.
- Pulley transmission by means of V-types belts.
- Water tank for cooling of various strands.
- Strand Pelletizer / Die-face cutter (water & air cooling).
- For more Production we also provide L/D upto 35:1.

Material

LDPE

LLDPE

HM

PP

PET

Polyester

Nylon

PVC

MODEL	PPM-50E	PPM-65E	PPM-75E	PPM-90E	PPM-100E	PPM-120E	PPM-140E
Screw Diameter (mm)	50	65	75	90	100	120	140

Why PANCHAL?

High-tech from the world market leader

Top-notch state-of-the-art recycling technology

Superior end product quality

Best customer service and care and therefore reliability for the user

Tailor-made, individual solutions possible through large engineering capacity with more than

28 years experience in plastic recycling technology

Superb reliability, flexibility and productivity

Your best partner

PANCHAL PLASTIC MACHINERY PVT. LTD.

Plot # 127, G.I.D.C., Umbergaon - 396171,
Dist. Valsad, Gujarat, INDIA.
