

# PET Washing Line

## PET Washing Line For Post-Consumer PET Bottle (500/1000/2000 Kg/hr)

The line is able to sort, grind, wash and clean with drying post-consumer bottles from municipal waste collect. The end use of the bottles is supposed to be either in the field of textile fiber and monofilament or sheet with different thicknesses for thermoforming and or high quality pellets with IV increase through an SSP (Solid State Polycondensation) or for excellent applications in the compounding.
